WHY ADVERTISE ON A PODCAST?

“According to results of a new ComScore study, ads within a podcast were found to be the least intrusive when compared with other types of digital ads. Not only do listeners not mind hearing them, they act on them. The study of 2,000 U.S. respondents ages 18-49 found that 2/3 of listeners have acted on ads they heard in a podcast either by researching a product or service or by actually purchasing something they first heard about in an episode.”

“The demographics of listeners should also be appealing for advertisers: Nearly 1 in 5 Americans between the ages of 18 and 49 listen to podcasts at least once a month. Listeners tend to have a college education, \$100,000 or more in household income, and describe themselves as early adopters of tech, movies, and consumer packaged goods.”

COMSCORE SAYS PEOPLE PREFER ADS IN PODCASTS OVER ANY OTHER DIGITAL MEDIUM

“65% of podcast listeners said podcast ads increase purchase intent while another 45% said that they’re likely to visit an advertiser’s website after hearing an audio promo. Another 42% of listeners said they would consider a new product or service after hearing a plug for a brand, while 37% use podcast ads to help research brands.”

65% OF LISTENERS ARE LIKELY TO BUY A PRODUCT AFTER HEARING AN AD IN A PODCAST.
